## Cursor and Triggers

**Considering the tables of Assignment 7, perform the following tasks:**

**Cursors:**

1.      Create a cursor to fetch the count of customers and sellers.

2.      Create a cursor to display all the product details with rating more than 3.5.

3.      Create a cursor to display all the products category wise.

**Triggers:**
1.      Create a trigger to update the remaining quantity of product in the product table, when a new entry in order_products table is inserted.

2.      Create a trigger to update product rating and seller rating when a new entry in the order_products table is inserted.

3.      Create a trigger to check when a new entry is to be inserted in the order_products table the quantity column satisfies the remaining quantity column from the product table.
